

Mobile Satellite Services Association

Empowering Global Mobile Connectivity: Accelerating the NTN Ecosystem

Unlock the future of global mobile connectivity by joining the Mobile Satellite Services Association (MSSA). Our mission is clear: Develop the non-terrestrial network (NTN) ecosystem for smartphone Direct-to-Device (D2D) and IoT as a seamless extension to mobile coverage aligned with 3GPP standards and MSS capabilities.

As a global non-profit industry association, MSSA facilitates the integration and evolution of terrestrial and NTN mobile services, delivering scalable, sustainable, and affordable connectivity to any device, anytime, anywhere.

Why Join MSSA?

- 1. Support open interoperable architectures and standards for transformative satellite-to-terrestrial mobile telecommunications services.**
- 2. Facilitate seamless global roaming.**
- 3. Accelerate adoption of innovative and superior services across reliable and secure licensed MSS spectrum.**
- 4. Participate in and benefit from the scale of a worldwide mobile marketplace.**
- 5. Support the deployment of a universal and sustainable network design and operations to enable affordable new services.**
- 6. Help define common standards that enable interoperable architectures.**
- 7. Facilitate coordination of 3GPP NTN standards activities and ecosystem development.**

MSSA Is For:

- ✓ Mobile Network Operators (MNOs) and MVNOs
- ✓ L- and S-Band Spectrum Rights Holders
- ✓ Mobile Phone Manufacturers
- ✓ Automotive OEMs
- ✓ Network Infrastructure Providers
- ✓ Satellite Operators
- ✓ Chipset Vendors
- ✓ Application Developers
- ✓ IoT Companies
- ✓ Government Stakeholders
- ✓ Test Equipment Vendors
- ✓ Standardization Bodies
